- Legs moderately long; tall long: 5

**COAT (30)**
- Moderately long length, with abundant guard hairs, but minimal woolly undercoat: 20
- Color of body and points: 10

(The 10 points for color are to be divided 5 for white markings and symmetry, and 5 for body and point color.)

**GENERAL**: The Ragdoll is a well balanced cat with no extreme features. They are a medium to large, moderately long-haired, blue-eyed pointed cat. The point markings may be covered by a range of white overlay patterns. Ragdolls are slow maturing, reaching full coat and color at about three years of age. The Ragdoll is an affectionate and intelligent cat, giving the impression of graceful movement and subdued power, striking in appearance.

**HEAD**: size and shape: proportionately large with a broad, modified wedge that is equilateral in shape, where all sides are of equal length as measured from the outside of the base of the ear to the end of the gently rounded muzzle. Appearance of a flat plane between ears. Cheeks in line with wedge. Allow for jowls in adult males. When whiskers and fur are smoothed back, the underlying bone structure is apparent.

**EYES**: large, vivid blue ovals. Wide set and moderately slanted, complementing wedge.

**EARS**: medium-sized. Wide set and moderately flared, continuing the line of wedge. Wide at base with rounded tips, and tilted forward.

**PROFILE**: slightly curving; ending in straight, medium-length nose. Chin well-developed, strong, in line with nose and upper lip.

**NECK**: heavy and strong.

**BODY**: large and long, broad and solid, with heavy boning. Rectangular in shape, with a full chest and equal width across shoulders and hindquarters. Body firm and muscular, not fat. Moderate stomach pad on lower abdomen acceptable. Females may be substantially smaller than males. Allow for slow maturation in young adults.

**LEGS**: heavily boned, moderately long. Hind legs longer than front. Shorter fur on front legs, longer fur on hind legs, with full, feathery britches.

**PAWS**: proportionately large, round and feather-tufted.

**TAIL**: long, with full plume.

**COAT**: the naturally non-matting moderately long fur is characterized by abundant guard hairs and minimal woolly undercoat. It follows with the body. Ruff preferred. Short on face, longer on ruff, shorter on shoulder blades, lengthening toward tail. Allow shorter coats in unaltered adults, and seasonal variations.

**PENALIZE**: coat: thick undercoat, standing off from the body.

**COLORPOINT PATTERN**: points: absence of white chin.

**VAN PATTERN**: points: white must go up to and around the wrist joint.

**MITTED PATTERN**: points: legs (except for feet), ears, mask, and tail well-defined. May have a white blaze in the shape of a star, diamond, hour-glass or line in one patch or broken, centrally and symmetrically located anywhere from the top of the nose leather to the forehead. Chin must be white and extend into white belly stripe. Front feet: white mittens present on both feet, evenly matched, preferably going up and around the wrist joint. Back legs: white must go up and around the hocks entirely, extending no higher than mid-thigh.

**COLORS** (all patterns): the six point colors are seal, blue, chocolate, lilac, red and cream. Point colors may be solid, lynx (including tortie-lynx); and parti-colored (or tortie). All Ragdolls are point-ed, but points are partially overlaid with white in the Mitted, Bi-color and Van patterns. **Body**: even, subtle shading is permissible, but clear color is preferable. Allowance should be made for darker color in older cats as Ragdolls generally darken with age, but there must be definite contrast between body color and points. **Points**: (except for white overlay) mask, ears, legs, feet, tail dense and clearly defined. All of the same shade. Mask covers entire face including whisker pads, and is connected to ears by tracings. Mask should not extend over the top of the head. No ticking in points. Stomach pad may have darker shading.
